GRIP-LOK® Nasal Gastric Securement

Grip-Lok® Nasal Gastric offers firm securement of feeding tubes and will fit a wide range of tube sizes.

This Grip-Lok® secures the feeding tube length wise, typically across the patient’s cheek.

Grip-Lok® is applied in the same simple manner as a bandage and can be easily placed and adjusted with gloved hands.

Features:

- Soft and flexible fabric design is less prone to catching and improves patient comfort
- Provides superior securement for both horizontal and vertical lifting accidental pulls
- Simple to apply, inspect and adjust
- Hypoallergenic, breathable and latex-free to reduce the risk of allergic reactions and skin irritation

**Features:**

- Breathable hypoallergenic skin contact adhesive
- Grip-Lok® Nasal Gastric Securement Sterile, Individually Packaged

Application of GRIP-LOK® 2100ANG for Nasal Gastric Securement

Prepare the skin according to the standard hospital protocol for dressing application. Skin prep or hair removal may be required on some patients for better adhesion. Skin must be CLEAN and DRY prior to Grip-Lok® application.

1. Remove half of the bottom release liner from the Grip-Lok® that will be closest to the nose.

2. Slide the Grip-Lok® under the tube using the side notch as a guide for tube placement.

3. Remove the other half of the bottom release liner from the Grip-Lok® and gently apply pressure to adhere to skin.

4. Open the fabric over-strap and remove the inside release liner from the Grip-Lok®.

5. Place the fabric over-strap in the center and next to the nose over the tube leaving the end fabric over-strap under the tube.

4. Secure the tubing by conforming the fabric over-strap to the shape of the tubing.
