GRIP-LOK® Universal PICC Catheter Securement

Grip-Lok® Medium Wide Adhesive for Universal PICC Catheter Securement is a catheter stabilization device that is strong enough to lock catheters securely in place, yet versatile enough for almost any securement situation.

The adhesive on Grip-Lok® MWA will adhere and secure PICC hubs made from silicone, PVC and other plastic compounds.

Manufactured catheter stabilization devices are listed as "preferred" in the Infusion Nursing Standards of Practice because they increase catheter dwell times while reducing unscheduled restarts and other catheter complications.

Features:

• Soft and flexible fabric design is less prone to catching and improves patient comfort
• Provides superior securement for both horizontal and vertical lifting accidental pulls
• Simple to apply, inspect and adjust
• Hypoallergenic, breathable and latex-free to reduce the risk of allergic reactions and skin irritation

GRIP-LOK® Universal PICC Catheter Securement

Grip-Lok® 3300MWA will secure a wide variety of catheter hub sizes and shapes.

Features:

• Soft and flexible fabric design is less prone to catching and improves patient comfort

Application of Grip-Lok® 3300MWA for PICC Securement

Prepare the skin according to the standard hospital protocol for dressing application. Skin prep or hair removal may be required on some patients for better adhesion. Skin must be CLEAN and DRY prior to Grip-Lok® application.

1. Open the top fabric over-strap and remove the inside release liner. Slide the Grip-Lok® under the catheter centering the hub above the adhesive area.

2. Secure the fabric over-strap down over the catheter and press around and on top of the catheter and lumens to firmly attach the adhesive.

3. While holding the Grip-Lok® and catheter in place with one hand, remove the bottom release liner from one side and adhere to skin.

4. Then remove the other bottom release liner and secure that side to the skin. Gently press down around the edges and top surface of the Grip-Lok® to ensure the adhesive connects well to the skin and to the PICC.

Grip-Lok® 3300MWA will secure a wide variety of catheter hub sizes and shapes.
