Luminor 35
Paclitaxel eluting PTA balloon dilatation catheter

Safe and precise delivery of Paclitaxel
The Paclitaxel eluting balloon “Luminor 35” is a double lumen catheter from the connector to the tip (also called over-the-wire, OTW) designed for percutaneous transluminal angioplasties of large peripheral arteries.

Indications:
Dilation of stenosis located in the iliac, femoral, ilio-femoral, popliteal, infrapopliteal and renal arteries, as well as for the treatment of obstructive lesions of arteriovenous fistulas, whether original or artificial, with a reference diameter balloon from 5 to 7 mm and lengths from 20 to 150 mm. It is also indicated for stent post-dilation in the peripheral vascular system.

Best DCB ever
Backed up by clinical studies

Paclitaxel in a microcrystalline form
Better transfer to the vessel and retention vs. time

Outstanding balloon catheter design
Lower profiles, and thanks to its conical form it has a short deflation time and great pushability and trackability

Proprietary nanotechnology
dosage system for having an uniform and ultrathin layer
Luminor 35
Paclitaxel eluting PTA balloon dilatation catheter

**Usable catheter length:**
- 80 cm and 140 cm

**Nominal pressure:**
- 6/7 atm
- RBP: 16 atm
- ABP: 23 atm

**Recommended guidewire:** 0.035”
**Tip profile:** 0.036”
**Crossing profile:** from 0.065” up to 0.077”
